Remarks

Phone interviews on October 5, 2005 and November 7, 2005 resulted in no agreement but the Examiner suggested that non on/off control might be allowable.

An RCE is herewith.

Claims 2 and 3 as amended provide incremental control of the flow of fuel in inverse response to corresponding changes in fuel inlet or fuel outlet pressure, respectively. The support for these claims is lines 2-5 of page 4.

This feature of incremental response is not suggested in the prior art. Examination and allowance of claims 2 and 3 is requested.

Respectfully submitted,

M. P. Williams

Attorney of Record
